In dieser Tabelle wird das Zoll/INCH als 32 mm (anstatt 25,4mm) angenommen und in Teile/Brüche bis zu 1/64 zerlegt.

Diese Vorgehensweise hat den Vorteil, daß bis zu den 32. Brüchen alle Maße volle mm und die 64. Brüche noch 1/2 mm sind.

Der Nachteil dieser Vorhensweise ist jedoch, daß die Modelle um ca. 26% größer werden.

Für die Richtigkeit des Inhaltes übernehme ich keine Gewähr
